

June 2021
NO.5

Science Island Express

The Science Island Express delivers the most recent big things happening at HFIPS.

Cover paper of *Nature* !

A collaborative team from HFIPS, and the Universities of Oldenburg and Oxford gathered evidence suggesting that a specific light-sensitive protein in the eye named cryptochrome 4 is sensitive to magnetic fields and plays essential roles in magnetic sensing in migratory birds such as European robins. This joint work was published as the *Nature* cover paper on June 23.

CONGRATS! The Class of 2021.

If the version of you from years ago could see you right now, they'd be so proud. Our commencement ceremony was celebrating on June 25 more than three hundred graduates receiving their diplomas this year.

We
are
ONE !

On the occasion of graduation, HFIPS's international students and experts gathered in Anhui Museum to have a diverse culture tour to experience HFIPS's values of Diversity and Inclusion.
