

July 2021
NO.6

Science Island Express

The Science Island Express delivers the most recent big things happening at HFIPS.

HEALTH

HFIPS researchers developed a non-invasive prediction model to distinguish malignant pulmonary nodules by using a new bisulfite-free technique to identify differentially methylated regions (DMRs) of cfDNA between Lung tumors and normal controls and artificial intelligence to build the model.

SUMMER CAMP

The 2021 Science Island College Talent Summer Camp kicked off on July 20 providing over four hundred and seventy junior students a four-day tour on Science Island with oral academic reports and lab tours.

AWARD

HFIPS establishes the International Cooperation Promotion Award to recognize HFIPS individuals or groups for their contribution to promoting international cooperation. This year, also the first year, the award went to two groups, namely ITER TAC1 and Quantum Center Team for their impressive work in ITER TAC1 bidding and scientific collaboration.
