

Science Island Express

The Science Island Express delivers the most recent big things happening at HFIPS.

ENVIRONMENT

For water issue tackling, HFIPS researchers developed a pseudo-capacitive electrode with high absorption capacity, selectivity and stability for electro-sorption of hardness ions.

HEALTH HFIPS developed a nucleic acid analysis system to provide an easy and integrated experimental platform for molecular diagnostic-related research and potential medical diagnostic applications.

EMPLOYEE CARING

HFIPS takes actions to implement its policy in employee parenting support to build a new daycare center.

Happy Mid-Autumn Festival
